

SCHOOL PROGRAMS

for Pre-K to 4th Grade

Do you know what makes ice cream so creamy?

Kids won't know they're learning in Patty O'Brien Novak's fun-filled, interactive programs. Explore how everyday things work through activities such as building graham cracker houses, experiencing earthquakes, playing balloon games & creating pop-up cards.

Or how a video game is made?

Patty O'Brien Novak is an experienced and engaging children's presenter & author having spoken to over 1,500 kids this year alone. Patty's passion for learning how things work is contagious!
